

## PIP 3614 Protective White 18 Inch Boot Cover

The low lint, latex free PIP Microporous White 16 Inch Boot Cover meets the NFPA 99 Antistatic PPE test to protect against dry particulates and liquid sprays with PosiWear BA for breathable, waterproof coverage. When the shift is over make sure that you leave your work behind and step out to a fresh start. These pure white boot covers keep your feet cleanly covered to the top of your boots with a comfortably snug latex free elastic band around the top to keep out debris so worksite contaminants stay behind and outside dirt doesn't get tracked in. At the end of the day, just toss it away and leave the mess behind. Microporous PosiWear BA material is breathable, extremely low linting and remarkably durable and protective from a variety of wet and dry contaminants to keep you clean from dust, dirt and messes. The low lint surface has excellent static resistance for safety in electrically sensitive work areas.

### Features
